

Active Balance is currently searching for a Registered Massage Therapist to join our multidisciplinary clinic.

Located in the heart of Nelson, BC, our clinic's focus is compassionate, client-centred care encouraging practitioner and patients' individual growth and development as we pursue education of health, fitness, and recovery. The clinic currently provides chiropractic care, acupuncture, and clinical counselling to a wide range of clientele, supports in-house referrals from all services, and values the importance and collaboration of all different professions. The ideal candidate would work alongside these different disciplines and future expansion to various other modalities.

The office currently utilizes front-office administration to support appointment scheduling, billing, and general office flow. Patients have access to online booking platforms and direct billing services. Practitioners use Jane.app for EHR and online booking, experience using this platform is an asset but not required. The office provides all advertising and social media promotion for these practitioners.

The ideal candidate must hold a licensed registration and be in good standing with a regulatory body, with their own liability insurance. We will help the transition into British Columbia by sponsoring some of the licencing fees

We are looking for a Registered Massage Therapist who is a team player, interested in working collaboratively with other practitioners and values the clinic's overall approach and client-focused treatments. There is already a patient base waiting for our new Registered Massage Therapist.
